**Subject:** Draft Hotsite

Hi guys,

I won't be in the office this afternoon, but please review the hotsite I drafted, edit, and send out. Sorry it's such a draft, but I believe I hit all the points we covered in our call. I highlighted things that could use more detail or I'm unsure about...

"The fire watch period is expected to end this afternoon. There have been no flare ups since the fire watch began on Saturday. The property owner met with federal, state, and local officials yesterday, and has verbally agreed to comply with the State Order to erect a fence around the property, provide an inventory of chemicals stored in the facility, and conducted associated cleanup activities. OSC Wagner is working with EPA attorneys to draft an access agreement to conduct ash sampling on the property at a later date.

EPA is wrapping up 24-hr air monitoring efforts. All 24-hr air monitoring will cease at 1600 today. Particulate data will be updated on the response.epa.gov website. AreaRae data will be formatted for HQ approval to post on the response.epa.gov website. Air sampling is planned for later this week; summa canisters will be deployed for 12-hr air sample collection surrounding the site as part of post-event sampling.

Area schools were reopen today. Air monitoring was conducted at schools yesterday and today using EBAM monitors. OSC Wagner will discuss results from this air monitoring with the schools later today. No peaks were seen above "healthy" AQI ranges.

EPA will assist local responders with equipment inspections to determine if equipment is contaminated from firefighting activities.

ATSDR will continue with assist local and state health officials in analyzing results as they come in and creating a message; county health department will be lead for public information dissemination."
